

Typical Cross Section

Drawing Title : Lavenham Summerhouse (3800) Base Plan

Tolerance +/- 20mm.

Base should be level and even finish with a minimum clearance distance all round of 300mm (12") from any obstructions to a height of 2400mm.

For buildings not surrounded by hard standing we further recommend a surrounding gravel bed of approx. 500mm to prevent "splash back" from rain water on soil.

Consideration should also be given to finished ground level. We recommend finishing the concrete base 25mm above outside finished ground level (see typical cross section).

Scale :
 Drawing should not be scaled

Dimensions :
